Seats 400
Reverberation time 0.4 s

La Géode is a hemispherical movie theatre on the Parc de La Villette in Paris.

It offers a field of vision of more than 180°. The concave shape of the walls can create acoustical problems, in particular focusing. Broad band absorbing materials in a diffusing arrangement were applied to overcome these problems. Furthermore, a lot of attention was paid to sound insulation and the control of the noise of the technical installations.
