

Haus Witten

Witten

Client Municipality of Witten
Architect von Busse, Klapp, Brüning
Completed 1996
Volume 1,150 m³
Seats 120
Reverberation time \approx 1.2 s

The former castle ruin Haus Witten has been completely refurbished and equipped with a music school and a chamber music hall (Kammermusiksaal). Because of the railway track running very close to this space, additional sound insulation was needed and realised by a glass box-in-box construction. Special absorber elements were developed and tested in the reverberation room of the Peutz laboratory.
